PROFESSIONAL SUMMARY

Computer Science and Engineering graduate specializing in Artificial Intelligence with hands-on experience designing, building, testing, securing, and maintaining scalable software systems. Well-versed in the complete Software Development Lifecycle (SDLC) and Test-Driven Development (TDD) principles. Strong troubleshooting and debugging skills across backend, database, and system integration layers. Technical developer with academic foundations in Java and C++, and practical project experience building multithreaded data ingestion applications, REST APIs, and automated testing suites. Published IEEE researcher with solid knowledge of Object-Oriented Programming (OOP) and Data Structures and Algorithms (DSA).

EDUCATION

Bachelor of Technology: Computer Science & Engineering (Artificial Intelligence) **2022 – 2026**
Narasaraopeta Engineering College, JNTUK | CGPA: 7.79 / 10.0 (No standing arrears)
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Software Engineering, Web Technologies.

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, SQL, HTML5, CSS3, Java (Academic), C++ (Academic)
Core Concepts:	Object-Oriented Design (OOD), Data Structures & Algorithms (DSA), SDLC, Test-Driven Development (TDD)
Testing & QA:	Unit, Integration, Regression, Automation Testing (Playwright, Jest), System Debugging & Troubleshooting
Frameworks & Tools:	React, FastAPI, Node.js, Express.js, WebSockets, JWT, PostgreSQL, Supabase, MongoDB, SQLite, Git, Docker

WORK EXPERIENCE

Full-Stack & AI Systems Engineer (Contract / Independent) **2026 – Present**
Independent Software Engineering **Guntur, India**

- SDLC Management:** Managed the complete software development lifecycle from requirements gathering and system architecture design to implementation, testing, and deployment.
- Testing & TDD:** Implemented test-driven development methodologies, writing comprehensive unit and integration test scripts to validate API parameters and data payloads.
- Debugging & Troubleshooting:** Diagnosed and resolved complex integration bugs across backend services, database transactions, and WebSockets communication layers.
- Technical Documentation:** Authored structured system design layouts, developer API reference guides, and deployment operations manuals.

FEATURED PROJECTS

RotorDyn AI — Vibration Analysis Telemetry SaaS & Desktop Platform
Technologies: Python, FastAPI, React, TypeScript, PostgreSQL, Supabase, PySide6, SQLite, Plotly.js, D3.js

- Engineered a multithreaded data-processing system to stream and parse raw machinery accelerometer logs, executing Fast Fourier Transforms (FFT) for diagnostic reporting.
- Developed local database replication (WAL mode) and local API services to build a standalone Windows desktop app using PySide6.

- Enforced database Row-Level Security (RLS) policies and JWT session authorization, and wrote Jest automation tests to verify responsive canvas widgets.

Contest Hoster — Programming Contest Platform

Technologies: Node.js, Express.js, MongoDB, React, WebSockets, JWT

- Developed a web application for programming contests utilizing WebSockets to handle real-time scoring updates and contest event streams.
- Designed validation routes for contest submissions and secured user metadata sessions using JSON Web Tokens (JWT).

CodeOrigin v4 — Static Repository Auditor

Technologies: Python, FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, Git

- Developed code analysis pipelines in Python using AST parsers to audit codebase quality, evaluate package dependency loops, and flag licensing conflicts.
- Built scoring modules that automatically audit repository complexity, security vulnerabilities, and technical debt.

RESEARCH & PUBLICATIONS

Explainable Artificial Intelligence Research Paper

Published: 2026

IEEE Xplore Research Publication

- Conducted research on Deep Learning safety and transparency parameters, evaluating model interpretability and activation attributions.
- Co-authored a paper presented at an IEEE conference detailing neural network validation methods.
